SkyWater Technology Statement of REACH Compliance

Under the European Union EC 1907/2006 regulation, known as REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals), SkyWater Technology's products are defined as "articles". As defined in article 3(3) of the REACH regulations, SkyWater's articles do not release substances under normal use.

SkyWater Technology is a US manufacturing company that does manufacture product, import, place on the market and/or use substances in mixtures or in articles. Article 33 of the REACH regulation requires companies to communicate the presence of any REACH Candidate List Substance within supplied articles above the 0.1% by weight threshold.

SkyWater has determined, to the best of its knowledge, that it does not meet these criteria for any Substances of Very High Concern (SVHC). Additionally, registration of substances used in the manufacture or packaging of its articles does not apply to SkyWater products as outlined in Article 7 of the REACH regulations.

The updated candidate list of the SVHC for authorization can be found at:

<https://echa.europa.eu/candidate-list-table>.

SkyWater meets REACH compliance by sourcing only compliant components and following compliant techniques and procedures in the fabrication of our products. SkyWater Technology is committed to conducting operations in an environmentally, socially, and ethically responsible manner, complying with all applicable laws and regulations of those countries where we do business. This commitment includes the safe use and identification of chemicals per the applicable requirements of the European Community regulation.

SkyWater is also committed to providing our customers with information regarding substances of concern in our products. We continually work with our suppliers to ensure that all pre-registration requirements are met and that they remain in full compliance with current and future REACH requirements.

SkyWater Technology Authorized Signatory
